

## HELLO!

Organized tech savvy creative who's passionate about design, soccer and apple products. Influenced by individuals trying to recreate the spectrum and uncover something new or even an extension onto something with a personal creative twist.

A Design and Visual Communications major at UW-Milwaukee, looking forward to the everyday challenge with creating something unique and captivating for the public to observe. A previous graduate of WCTC Design Program, I was able to capture many technical skills in the Adobe Creative Suite. Focusing and honing in on using each of the programs assisted me in having technical skills become a first instinct with great in depth communication to follow.

Currently working within Restaurant Operations at UWM as a student graphic designer, where we are a team of student ran creative all working together to create weekly and monthly sign-age, menus and specials all for the UWM restaurants spread around campus, bringing adequate responsibility for the numerous and various units.

As well as being fortunate enough to working along side Two 3 Design Ink, interning there for a semester, where I was able to discover specific skill, seeing both sides between production and design. I was to create team jerseys, logos and apparel and widen my design techniques.

High school design courses evoked a creative freedom that couldn't possibly be inverted for a lifetime to come. With an insight on design and the ability to be creative everyday is the ultimate achievement.

*Modern, elegant and fresh*
